Most educational institutions, including colleges, training centers and academies, use a variety of technology products with limited features intended to perform only select tasks. Most of these systems don’t communicate with each other, fueling the need for separate platforms. This increases the total cost of ownership and results in school personnel performing redundant tasks.

Orbund provides an enterprise management solution that automates functions paramount to recruitment, registration, e-learning, billing, contact management, reporting and so much more.

**SOLUTION**

**YOUR INSTITUTION**
Although Orbund established itself as an industry-leading software provider primarily designed to meet the needs of the traditional K-12 and postsecondary markets, we have recently uncovered a need in today’s non-traditional centers and academies for enterprise management. No matter if you are a center that trains our future bricklayers, electricians, carpenters, police or fire personnel, we have a system designed to meet the unique needs of your facility.

**NEW SYSTEM**

Pairs the functionality of a “standard” Student Information System with integrated Contact Management and Online Learning Management tools. This eliminates our clients’ need for multiple software systems and allows them to manage every aspect of their administrative tasks in one system online.”
