## Opening Questions

Would you like to provide education to all students in all campuses and departments under one single management system?

Would you like to provide students access to their academic and performance records?

Would you like to provide online education in future and attract students from other regions or countries?

## Solutions

Einstein allows all administrators and staff manage the university through ONE system. So, there is no issue with transferring records from one system to another.

Instructors can access their grade book, and prepare lesson plans from anywhere.

Students can view their progress reports real time and see what assignments they missed and what homework assignments are due.

Students can communicate with the teachers using messaging. Teachers can send announcements for class on upcoming tests, projects, field trips or just class rules.

The system will send an alert to the students by email, text messaging on cell phone, notifying about any messages, announcements or grade posted by a teacher.

The administrator can print the semester reports, invoices, and transcripts from any workstation. This saves the university a lot of time and money.

The system completely integrates with the university website. So there is no need to update the website for announcements, events calendar, staff directory etc.

Accepting and processing online inquiries, applications and class registration.

The whole system is very customizable and can support international standards and many languages.

## Students

Einstein allows students to follow their academic progress in class. Each student will be given a username and password to access their academic records from home.

- \* Homework assignments
- \* Grades
- \* Academic reports
- \* Transcript
- \* Submit assignments online
- \* Discuss class lessons

- \* Enroll in courses
- \* Announcements of upcoming tests, events etc.
- \* Events calendar
- \* Private Messaging (communicate with instructors)
- \* Access invoice and pay online

## Instructors

Using Einstein instructors can manage class activities; prepare, post and receive homework online and maintain communication with students on a regular basis. Progress reports can be generated automatically to help the teachers assist students in improving class performance.

- \* Grade book
- \* Lesson planner
- \* Attendance records
- \* Progress reports
- \* Class announcements

- \* Course Materials
- \* Events calendar
- \* Private Messaging to answer student queries
- \* Class discussion

## Administrators

Administrators can manage all activities and records from anywhere in a highly secured environment. Online student enrollment reduces need for data entry staff and helps keep administrative costs low.

- \* Student, Teacher & Staff records
- \* Grade sheets
- \* Semester reports
- \* Transcripts
- \* Attendance reports
- \* Tuition payment tracking
- \* Events calendar
- \* News and announcements
- \* Private messaging
- \* Email and SMS alerts
- \* Contact management
- \* Track issues and complaints
- \* Print letters, labels, ID cards

## Benefits to Instructors

**Higher productivity** - Able to do work remotely from home, when on travel and during holidays.

Enable sharing and reuse of lesson plans for future intakes.

Able to use it for communicating from anywhere, with all parties, at anytime: facilitate visiting lecturers program.

Upgraded ICT skills and higher productivity for faster promotion and increment.

## Benefits to University

**Save up to 30%** on administrative costs

**Control and manage** the university and staff through a centralized Data center

Instant **Contact** with all parties through dispatch and announcement....useful during emergencies

Increase overall school productivity rate

No capital investment in equipment, server room or additional technical staff

**Smart university** image will allow to use this value added service as marketing tools to increase enrollment

## Benefits to Students

Speed up communications with instructors whenever needed.

Access lesson plan of teachers to plan and prepare coming classes.

Don't have to miss school work and even lessons when on medical leave or on travel.

Get instilled in ICT environment and applications at early age.

## Website Integration

Einsteint integrates with your university website. Visitors will be able to see up-to-date information without requiring any regular maintenance by a webmaster.

- \* News and announcements
- \* Events calendar
- \* Faculty directory with up-to-date list of courses teaching
- \* Student login

## About Us and Our Services

Orbund is an education technology company based in Kansas City, USA. Established in 1993.

We pride ourselves as a first class service oriented company - not just a technology company. We give special attention to all your needs, to make sure you are running smoothly all the time. This means not only do we provide 24 hours support 365 days a year, but also monitor our systems and try to resolve issues before they affect you.

We listen to your needs, and are improving functionality, performance and services every day to meet those needs.

## Technology and Security

### Application Security

We give special attention to protect and maintain all of your academic data on our servers. Our Einstein uses Digital Certificates and SSL security (same technology used by financial and medical technology systems) so that no one without proper authentication can access any academic records.

### Data Security

Data on our servers is backed up everyday and stored in a secondary hard drive as well as a secure offsite location, so that we can quickly and easily recover from any unforeseen disaster or circumstances.

### Network Security

Our servers are hosted in a robust data center, with redundant climate control systems, power backup, high speed redundant Ethernet, and RAID disk array systems. We give special attention and monitor our servers to maintain 24 hours up time and make sure your school is running smoothly.
