

Orbund's Online School System connects the four major groups involved with schools – students, teachers, parents, and administrators.

Students can access their homework assignments, grades, and other communications from the school, allowing them to better manage their studies and other school-related activities.

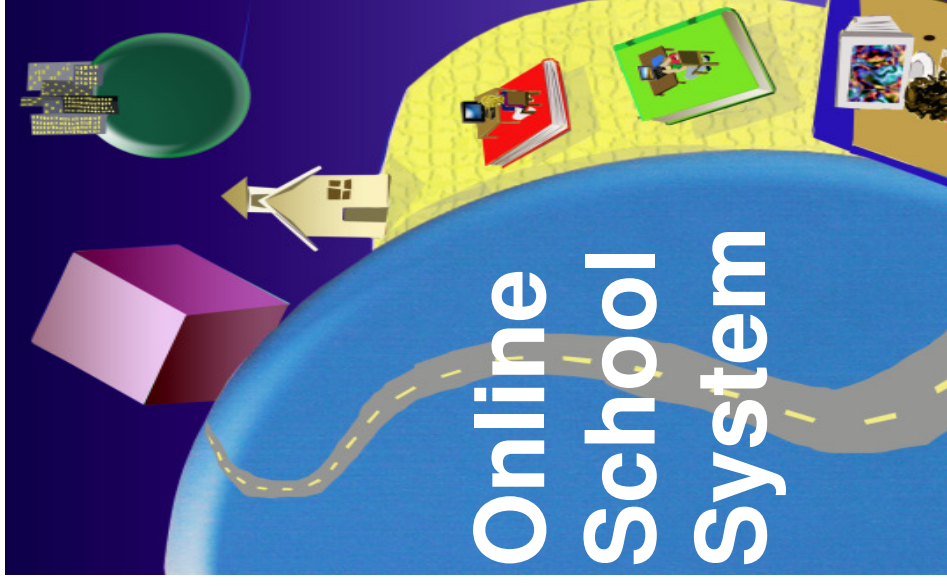

Parents can keep tabs on their children's progress at school by accessing the grades, progress reports and homework assignments from home, thus being able to be more involved in their children's education.

Teachers can manage grade book, lesson plans and attendance, generate progress reports, post homework and announcements, as well as communicate with students and parents regularly and easily – even from home.

Administrators can reap the benefits of anytime anywhere access and manage records, publish reports and post announcements – making the school a much more productive and efficiently run organization.

The ABCs of Online School System

Online School System is a multilingual web-based system for parents, teachers, students and administrators to manage, maintain, monitor and provide quality education to each child attending your school.

School Administration

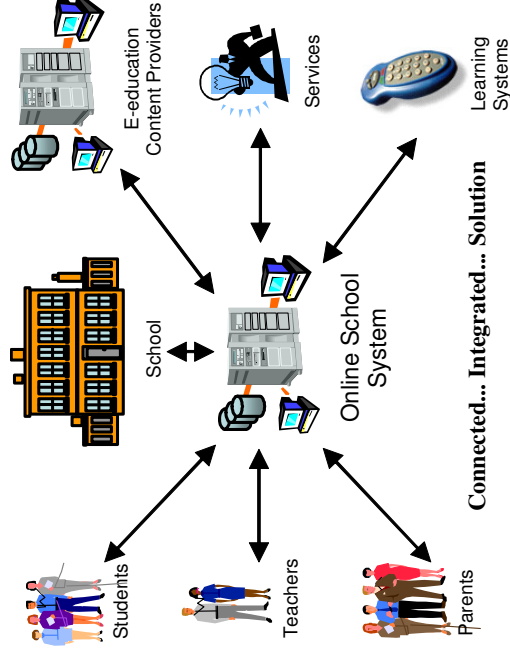

School administrators can easily prepare and access grade sheets, report cards, interim reports, transcripts and other records of the whole school remotely. Using the Online School System, administrators can work from anywhere.

- Manage school records
- Prepare class schedules
- Manage attendance
- Publish report cards & interim reports
- Generate transcripts
- Manage discipline records
- Manage immunization records
- Manage tuition and fees
- Manage food and bus services
- Manage events calendar
- Post news and announcements
- Communicate with parents and teachers

Classroom Management

Online School System allows teachers to manage their classes easily in less time so that they can spend more time with the students and help them in learning. Teachers can prepare lesson plans even from home. Progress reports can be generated automatically.

- Manage grade book
- Keep attendance
- Manage lesson plans
- Generate progress reports
- Manage discipline records
- Post class announcements
- Communicate with parents

Connected... Integrated... Solution

Parent Access

Parents will be given username and password to access their children's progress from home.

- Access homework & lecture notes
- View grades, progress reports & attendance reports
- View interim reports & report cards
- View transcripts
- View invoice and payment schedule
- View discipline & health records
- View class announcements
- Access school events calendar
- Communicate with teachers

Website Integration

Online School System will integrate seamlessly with your school website. Visitors will be able to see up-to-date information on the website without requiring any regular maintenance by a webmaster.

- School news and announcements
- Events calendar
- Lunch menus
- Staff directory

Instant Alerts

Online School System provides a built in Instant Alert System which can automatically call parents, teachers or other contacts with alerts, invitations and reminders. You can also send tuition reminders and announcements by email and SMS text message.

Multilingual Support

Online School System can support multiple language platforms to facilitate parent-teacher communication and allow non-English speaking parents to participate and be more involved in their children's education.

Setup and Data Migration

We provide full assistance to set up your online school system and make sure you are up and running as soon as possible. We will even help you migrate your school records from existing databases or spreadsheets using our data migration tools.

With Orbund services in place in your school, parents, teachers, administrators and students can all be on the same page, make progress together, and create an on-going atmosphere of learning success.

About Us

Orbund develops academic information systems for educational institutions. At Orbund, we strive to help you provide quality education through innovative and creative technologies.
