### **LETTER OF RECOMMENDATION**

---

The Dominica State College has been using the Online Varsity System for the last school year. It has indeed been a wonderful experience. This software is suitable to the needs of our college and incorporates the various departments such as Registration, Admission, Finance, helping them make the various processes much simpler and less stressful.

What is most impressive about this software is that it is user friendly and this has been confirmed not only by our Administration and staff members but this sentiment is also shared by the general student body.

Additionally, the technical support is impressive; consistent, dependable and efficient service has been received from the Orbund technicians.

We have no reservations in making recommendation for this Records Management Software.

Yours Sincerely

**Ashley Massicotte  
Associate Registrar**
